

St Andrew's Online Safety Newsletter for Parents 2 2024

This is our second newsletter to signpost online safety information to parents and carers. We hope that you find it useful.

Does your child watch livestreams?

What is livestreaming? Livestreaming is when an individual broadcasts video live over the internet. People can watch livestreams from any device that is connected to the internet.

Who is watching livestreaming? Research from Ofcom reported that 57% of 3 – 17-year-olds have watched live streams and the most used platforms to watch live streams were YouTube and TikTok. The research also showed that the percentage watching content on livestreaming app/sites increased by age. A third of 3 - 4-year-olds were watching live content with this number growing to eight in ten of 16-17 year olds. This is reported in [Children and parents: media use and attitudes report 2022 \(ofcom.org.uk\)](#)

What are the risks?

There are risks associated with watching livestreams that you should be aware of. The main risk being that your child may see or hear something inappropriate as your child may come across themes or content that is not suitable for them. It is difficult to moderate live content as it is happening in real time.

How can I help my child?

- All online platforms have an age rating, ensure your child only accesses platforms that are appropriate to their age. For example, TikTok has an age rating of 13.
- For any platforms that your child uses, ensure appropriate parental controls and privacy settings are applied.
- Take an interest in what your child is doing online and on a regular basis, ask your child to show you what they are accessing.
- Ensure your child knows how to use any reporting/blocking tools on the app that they are using and as always please ensure that your child knows to talk to a trusted adult if they see anything that concerns them online.

Parental Controls:

Does your child play games online? We have outlined some points that you may wish to consider to try and create a safer experience for your child.

Have you set up parental controls?

As well as setting up appropriate parental controls through the game's setting, ensure you have set them up on the console/device your child is playing on. For example, many consoles allow you to restrict the games accessed by age.

Chatting to strangers:

Some games will allow communication, for example (FIFA and Fortnite). Depending on the game, this may be via the in-game text chat, direct messages or talking through headphones. Some games do offer the ability to switch communication off or restrict bad language so make sure settings appropriate to your child are set up for each of the games they play.

It can be difficult to moderate online chat so ensure your child knows how to block and report other players who make them feel uncomfortable and that they know to talk to you or a trusted adult if they have any concerns. It can also be very easy online for children to behave in a way that they would not if they were face to face with each other. Talk to your child about how they are speaking to others online and encourage them to talk to people online with respect, like they would if they were face-to-face.

Is the game age appropriate?

Before buying the game, check that your child is old enough to play it. All games will either have a PEGI rating or be rated by the App Store /Google Play. UK Safer Internet Centre have published a blog, which shares tips on what to do if your child asks about playing a new game:

<https://saferinternet.org.uk/blog/help-my-child-wants-to-play-games-that-are-too-old-for-them-2>

In app purchases:

In addition to the above, you should be aware of in app purchases as lots of games include the option to purchase additional items/subscriptions so ensure you do not have payment cards saved or set up restrictions/pin code to approve.

Further information:

The NSPCC provide further guidance and support regarding this topic:

<https://www.nspcc.org.uk/keeping-children-safe/online-safety/online-games/>

Parental Controls:

Does your child have a games console? If yes, have you set up age- appropriate parental controls? The controls vary across the different consoles, but all will allow you to restrict spending and communication for example.

PlayStation:

Set up your account as a family manager and create a separate child account so you can tailor their activities.

Find out more here: <https://www.playstation.com/en-gb/support/account/psn-safety-parents-guide/>

Xbox:

You can download an app to manage your child's gaming experience. Find out more

here: <https://www.xbox.com/en-GB/apps/family-settings-app>

Nintendo Switch:

Nintendo also offer a free app to monitor what and how your children are playing.
